UNITED STATES DISTRICT COURT

NORTHERN DISTRICT OF CALIFORNIA

MARC SILVER, HEATHER PEPPER,
DONOVAN MARSHALL, ALEXANDER
HILL, individually and on behalf of all others
similarly situated,

Plaintiffs,

v.

BA SPORTS NUTRITION, LLC,

Defendant.

Case No: 3:20-cv-00633-SI

**NOTICE OF MOTION AND MOTION
OF DEFENDANT BA SPORTS
NUTRITION, LLC TO DISMISS THE
FIRST AMENDED COMPLAINT
PURSUANT TO RULE 12(B)(6);
MEMORANDUM OF AUTHORITIES IN
SUPPORT THEREOF**

Date: August 28, 2020

Time: 10:00 a.m.

Judge: Hon. Susan Illston

Court Rm.: 1

Complaint filed: January 28, 2020

NOTICE OF MOTION AND MOTION

TO ALL PARTIES AND THEIR COUNSEL OF RECORD:

PLEASE TAKE NOTICE THAT on Friday, August 28, 2020 at 10:00 a.m., in Courtroom 1 of the above captioned Court, located at 450 Golden Gate Avenue, 17th Floor, San Francisco, CA 94102, Defendant BA Sports Nutrition, LLC (“BodyArmor”) will and hereby does move this Court for an order dismissing the claims asserted by Plaintiffs Marc Silver, Heather Pepper, and Alexander Hill (collectively, “Plaintiffs”) against BodyArmor in the above-captioned action pursuant to Federal Rule of Civil Procedure 12(b)(6) for failure to state a claim upon which relief can be granted and pursuant to Federal Rule of Civil Procedure 12(b)(1) for lack of standing.

The motion is based upon this Notice of Motion, the accompanying Memorandum of Points and Authorities in support of the Motion, the Declarations of Matthew Borden and Lee Soffer, and the Request for Judicial Notice in Support of the Motion, and the files and records in this action and any further evidence and argument that the Court may consider.

Dated: July 21, 2020

Respectfully Submitted,

BRAUNHAGEY & BORDEN LLP

By: /s/ Matthew Borden

Defendant BA Sports Nutrition, LLC (“BodyArmor”) respectfully submits this Memorandum in support of its Motion to Dismiss the First Amended Complaint for failure to state a claim.

INTRODUCTION

In George Orwell’s novel *1984*, the Party could rewrite the past by asserting that events and people never existed, and thereby gained the power to control the future.

In Plaintiffs’ First Amended Complaint (“FAC”), Plaintiffs attempt to rewrite “the Court’s findings that the statements ‘Superior Hydration’ and ‘More Natural Better Hydration’ are puffery, that a reasonable consumer would not be misled by the BodyArmor label” by pretending that they never existed. (Order Granting Motion to Dismiss (Dkt. No. 40) (“Order”) at 17.) But litigation does not work that way. Precedent matters. And parties cannot ignore Court Orders simply because they wish the past (or the future) were different.

Most of the FAC is directed to rearguing that “superior hydration” is not puffery (*e.g.*, FAC ¶¶ 5-10, 48-58) and that the label is misleading (*e.g.*, FAC ¶¶ 11, 47, 59). These claims contravene the Court’s Order and fail for the reasons the Court already found – Plaintiffs cannot fabricate a false advertising case when none of the statements they have identified is untrue. As the Court already found, “superior hydration” has no objective meaning, and Plaintiffs cannot claim to have been misled about the sugar content, when the sugar content is accurately and properly listed on the label. BodyArmor should not have had to defend against such claims once, much less again, especially given that Plaintiffs’ boundless theories of liability have been repeatedly rejected, and Plaintiffs themselves admittedly were recruited over the internet, rather than injured.¹

The Court granted Plaintiffs leave to amend to see if they could state a claim “based on non-label marketing and advertising,” but required that “plaintiffs must be able to allege that they saw and relied on those specific advertisements to their detriment.” (Order at 17-18.) Yet two of the Plaintiffs do not claim to have read any such advertisement, and the third fails to explain which

¹ As Plaintiffs conceded in their briefing on the last motion to dismiss, Plaintiffs included convicted felons and serial litigants who were recruited through a misleading lawyer internet solicitation. The convicted sex offender, Plaintiff Marshall, dropped out of the case on April 7, 2020. (Dkt. No. 25.)

1 of the avalanche of the materials cited in the FAC he supposedly relied on or how it supposedly
2 misled him – again in direct contravention of the Court’s Order.

3 Plaintiffs also offer a new claim that the real reason they bought BodyArmor is that they
4 thought that flavors like “Tropical Punch” contained fruit juice. This new made-up theory, which
5 contradicts their previous claims about why they bought the products, also fails. Nobody believes
6 that BodyArmor® Tropical Punch is composed of tropical punch (whatever that means) or that
7 Strawberry Banana contains banana juice any more than anyone believes that orange soda contains
8 oranges. These are just the flavors of the products, which Plaintiffs repeatedly bought over four
9 years because they loved the taste.

10 The FAC also fails for numerous other reasons identified in BodyArmor’s prior motion,
11 including that they are barred by the First Amendment, their unjust enrichment claim is redundant,
12 and Plaintiffs lack standing to seek injunctive relief.

13 Plaintiffs have failed to allege any additional facts capable of rendering their claims
14 plausible. Further amendment would be futile, and this case should be dismissed with prejudice.

15 **FACTUAL BACKGROUND**

16 This motion is based on the factual allegations in the Complaint, documents and things
17 cited therein, as well as judicially noticeable public materials set forth in BodyArmor’s Request for
18 Judicial Notice (“RJN”).

19 **A. The Parties**

20 **1. BodyArmor**

21 Defendant BodyArmor was founded in 2011 with the goal of producing hydrating, nutrient-
22 enhanced beverages. Unlike Gatorade, BodyArmor SuperDrink® is made with coconut water, pure
23 cane sugar, and natural flavors, as well as a proprietary blend of electrolytes and vitamins.
24 BodyArmor’s product has now become one of the most popular sports drinks in the country.

25 **2. Plaintiffs**

26 There are three plaintiffs in this case. Only one of them resides near to where any of their
27 lawyers are based.
28

1 Plaintiff **Heather Pepper** is a twice convicted felon (manufacture of a controlled substance,
2 retail theft) with a separate conviction for receiving stolen property. (RJN, Exs. 1-4.) Ms. Pepper
3 allegedly lives in Pennsylvania.

4 Plaintiff **Marc Silver** resides in Santa Rosa, California. He has previously been involved in
5 four unsuccessful lawsuits of various natures. (RJN, Exs. 5-8.)

6 Plaintiff **Alexander Hill** lives in New York City. (Compl. ¶ 22.)

7 **3. The Recruitment of Plaintiffs to Bring this Case**

8 Rather than being injured, Plaintiffs appear to have been recruited through a misleading
9 advertisement.

10 On November 25, 2019, Plaintiffs' lawyers posted an ad on the TopClassActions website,
11 stating: "Join a Free BodyArmor Class Action Lawsuit Investigation." (Declaration of Matthew
12 Borden ("Borden Decl."), Ex. 1.) This statement was misleading because there was no true
13 investigation occurring. The lawyers had already devised their claims, and it never costs any
14 money to participate in an investigation. The lawyers were simply using the guise of an
15 "investigation" to recruit plaintiffs.²

16 Plaintiffs' lawyers' solicitation further stated: "Attorneys working with Top Class Actions
17 are investigating whether BA lacks sufficient scientific evidence to back up such claims, which
18 may render their labeling and advertising deceptive and unlawful." (*Id.*) This statement was also
19 misleading because Plaintiffs' lawyers did not need any information from Plaintiffs to conduct such
20 a purported inquiry because they simply intended to resurrect allegations made by Gatorade once
21 they had recruited Plaintiffs.

22 The solicitation further stated: "They are also investigating other important matters with
23 respect to their advertising, including the implication that BodyArmor SuperDrink is good for your
24 body and health." (*Id.*) This statement was doubly misleading because nothing on the label of the
25 product or its advertising states that it is "good for your body and health." Further, Plaintiffs'

26
27 ² Courts have warned that using such websites to obtain "shills" to act as plaintiffs can give rise to
28 malicious prosecution claims. *See Citizens of Humanity, LLC v. Hass*, No. D074790 (certified for
publication on March 16, 2020), Slip Op. at 17-18 & n.5 (using plaintiff who registered her name
with Top Class Actions or classaction.com).

lawyers have never commissioned any study that required participation from any of the Plaintiffs – as they conceded in the last round of briefing on BodyArmor’s last motion to dismiss.

B. The Accused Product Labels

BodyArmor’s labels comply with all FDA regulations and accurately state the contents of the products. Because the Complaint references the label on BodyArmor’s products, but nowhere depicts a complete version of the actual label, the Court may consider the actual label (shown below) in dismissing Plaintiffs’ claims as it did in its prior order. (Order at 3.)

A true and correct copy of the labels is attached to the concurrently submitted Declaration of Lee Soffer. (Soffer Decl., Ex. 1.)

C. The Court’s Order Dismissing Plaintiffs’ Original Complaint

Plaintiffs initiated this case on January 28, 2020. (Dkt. No. 1.) The original complaint alleged various false advertising and common law claims, all of which were predicated on three theories: first, that the phrase “superior hydration” and similar language was inherently

misleading; second, that BodyArmor’s overall marketing was misleading because BodyArmor has more sugar than Plaintiffs’ lawyers think it should; and third, that BodyArmor was unlawfully fortified with vitamins and minerals in violation of various FDA regulations.

BodyArmor moved to dismiss all claims (Dkt. No. 20), and on June 4, 2020, the Court granted this motion. (Dkt. No. 40.) With respect to the “superior hydration” claim, the Court held:

[T]he statements “Superior Hydration” and “More Natural Better Hydration” are non-actionable puffery. These are general, vague statements about product superiority rather than a misdescription of a specific or absolute characteristic of the product.

(Order at 9.) The Court went on to explain:

The Court finds it implausible that a reasonable consumer would view the BodyArmor label and other marketing about “superior,” “more” or “better” and believe that BA was making a specific, verifiable claim about BodyArmor’s superior hydrating attributes.

(Order at 9-10 (internal citations and quotations omitted).) As for Plaintiffs’ sugar theory, the Court, relying on *Clark v. Perfect Bar*, No. C 18-06006 WHA, 2018 WL 7048788 (N.D. Cal. Dec. 21, 2018) and *Truxel v. General Mills Sales*, No. C 16-04957 JSW, 2019 WL 3940956 (N.D. Cal. Aug. 13, 2019), found Plaintiffs’ claim “implausible” because “it requires that a reasonable consumer ignore the prominently displayed Nutrition Facts disclosing the total amount of sugar, as well as the ingredient list stating that “pure cane sugar” is the second ingredient.” (Order at 15.)

The Court further found that:

A reasonable consumer purchasing a sports drink (in such flavors as Fruit Punch, Berry Blast, Tropical Fruit and Grape) would not be misled into thinking that simply because the label states that it provides “Superior Hydration” and contains vitamins and electrolytes, that this necessarily means anything about the overall health benefits of the product given the disclosure of the sugar content.

(*Id.*) Finally, the Court concluded that Plaintiffs’ claim based on a purported technical violation of an FDA fortification regulation also failed as a matter of law because BodyArmor did not make any of the “health” or “relative” claims prohibited by the FDA regulation. (*Id.* at 16-17.)

In light of the Court’s lengthy and extensive findings that the statements “Superior Hydration” and “More Natural Better Hydration” were puffery; “that a reasonable consumer would

not be misled by the BodyArmor label,” and that Plaintiffs failed to allege BodyArmor violated any FDA regulation, the Court limited leave to amend to whether Plaintiffs could state a claim based on off-label advertising, emphasizing that Plaintiffs had to be able to allege that they had relied on any such advertisement and why. (Order at 17-18.)

D. The FAC

Plaintiffs filed the FAC on July 7, 2020. (Dkt. No. 41.) Only one Plaintiff, Alexander Hill, asserts that he saw any off-label advertising. In the four paragraphs (FAC ¶¶ 96-99) about Mr. Hill’s review of off-label materials, he claims to have seen various store displays (FAC ¶ 96), although the displays depicted in the complaint appear to have been copied from the internet and were actually erected in places like Iowa, not New York City where Plaintiff Hill resides. *E.g.*, <http://www.shineentertainmentmedia.com/body-armor-gio> (website from which Image L of the Complaint was taken, which states this in-store display appeared at the Hy-Vee Supermarket in Iowa); <https://blog.catalpha.com/tips-to-better-point-of-purchase-displays> (website from which Image K was taken, a tutorial on building better in-store product displays). Plaintiff Hill also claims to have seen various social media postings, such as a post from the “Houston Moms Blog” (FAC ¶ 96), which was not made by BodyArmor. He also claims to have viewed a television advertising campaign from two years ago in which NBA stars James Harden and Kristaps Porzingis engaged in various anachronistic activities like using a typewriter, wearing colonial dress, or communicating via carrier pigeon, and suggest Gatorade is equally outdated. (FAC ¶ 98.) Plaintiff Hill does not allege that he relied on any of these particular advertisements to make any of his purchase decisions or explain why they supposedly misled him.

The FAC also alleges that BodyArmor’s labels are misleading because they describe the products as having various flavors – such as “Berry Lemonade,” “Fruit Punch,” or “Tropical Punch” – but do not contain “significant amounts of such fruits,” in supposed violation of various FDA regulations. The FAC alleges that Plaintiffs believed all the vitamins in BodyArmor came from these various fruits, though it does not specify which fruits correspond with which flavors or what quantity of fruits Plaintiffs expected to be in their sports drinks.

1 The remainder of the amendments to the pleading ignore the Court's Order and add various
 2 statements related to Plaintiffs' dismissed puffery and halo claims. The FAC adds discussions
 3 about scientific studies and athlete anecdotes, none of which are referenced on the products or
 4 which Plaintiffs claim to have seen, suggesting that drinking sports drinks can help serious athletes
 5 (which Plaintiffs are not – they are described instead as "sports enthusiasts," (FAC ¶¶ 15, 24, 31)
 6 like most Americans) prevent muscle cramps. (FAC ¶¶ 53-58.)

7 Based on these allegations, the FAC asserts the same eight causes of action as the original
 8 complaint. (FAC ¶¶ 135-209.)

9 **ARGUMENT**

10 "Under Federal Rule of Civil Procedure 12(b)(6), a district court must dismiss a complaint
 11 if it fails to state a claim upon which relief can be granted. To survive a Rule 12(b)(6) motion to
 12 dismiss, the plaintiff must allege "enough facts to state a claim to relief that is plausible on its
 13 face." *Bell Atl. Corp. v. Twombly*, 550 U.S. 544, 570 (2007)." (Order at 5.)

14 **I. THE CLAIM REGARDING OFF-LABEL MARKETING THAT THE COURT 15 ALLOWED PLAINTIFFS TO REPLEAD FAILS ON ITS FACE**

16 In allowing Plaintiffs to replead their claims based on off-label marketing, the Court held
 17 "plaintiffs must be able to allege that they saw and relied on those specific advertisements to their
 18 detriment." (Order at 17-18.) Plaintiffs' new allegations fail to do so.

19 Like its predecessor, the FAC cites various off-label advertising without explaining which
 20 particular statements any Plaintiff relied on, how any such statement was supposedly misleading, or
 21 why any such statement compelled any of the Plaintiffs to buy the product. Instead, the FAC
 22 generally alleges that Plaintiff Hill may have seen certain advertisements, or only some of them, or
 23 none at all but instead "substantially similar" ones. (FAC ¶¶ 99-100.) Leaving aside that Plaintiff
 24 Hill's claim that he saw the materials depicted in the FAC is likely false (for example, one of the
 25 in-store displays depicted in the FAC (Image L) was actually a display set up in a supermarket in
 26 Iowa as part of a promotional event with soccer player Giovanni Dos Santos,
 27 <http://www.shineentertainmentmedia.com/body-armor-gio>), nothing in the ads referenced by
 28

1 Plaintiff Hill is untrue, and the FAC offers no allegation of how any such statements misled
 2 Plaintiff Hill and caused him to buy the beverage.

3 The FAC also cites to a social media post from the Houston Mom Blog (Image M), which
 4 describes itself as “a locally focused parenting website written BY area moms, FOR area moms.”
 5 <https://houston.citymomsblog.com/about/>. Even assuming Plaintiff Hill reads a Houston moms’
 6 blog, this is not even a statement by BodyArmor.

7 Nor does any of the advertising referenced by Plaintiff Hill contain messages that are any
 8 different than the “Superior Hydration” or “More Natural Better Hydration,” that the Court already
 9 dismissed as puffery. Two of the in-store displays simply repeat “More Natural Better Hydration”
 10 in English and Spanish; another says “Switch to BodyArmor Sports Drink”; the Houston Mom
 11 Blog post says “Rethink Your Sports Drink,” and another social media posts says “This Sports
 12 Drink is Different.” These phrases are nothing more than general and truthful assertions that
 13 BodyArmor is a good and different product, which lack any comparator.

14 Plaintiff Hill further alleges that he saw a two-year-old television advertising campaign.
 15 (FAC ¶¶ 98-99.) This campaign consisted of several short ads in which NBA stars behaved in
 16 various anachronistic ways, like using a typewriter, a carrier pigeon, or wearing colonial dress. (*Id.*
 17 ¶ 98.) These advertisements suggested that drinking Gatorade was as outdated as these behaviors.
 18 Plaintiff Hill does not explain why this advertising supposedly fooled him into buying any
 19 BodyArmor product.³ Nor could he. To the extent there is any representation of fact in these
 20 materials, it is that BodyArmor is newer than Gatorade. That is true. Gatorade has been on the
 21 market since the 1960s; BodyArmor debuted in 2011. Moreover, marketing a product as a “new
 22 and improved” alternative is also “classic puffery.” *Robert Bosch LLC v. Pylon Mfg. Corp.*, 632 F.
 23 Supp. 2d 362, 367 (D. Del. 2009) (marketing “new and improved” and “innovative” wiper blades
 24 was merely puffery, as claims were not made with reference to any specific features” of products,
 25 and statements “are opinions and cannot be proved to be false”); *Laitram Mach., Inc. v. Carnitech*
 26 *A/S*, 884 F. Supp. 1074, 1083 (E.D. La. 1995) (statement that machines were “new and improved”
 27

28 ³ Plaintiffs’ assert that these ads “denigrate[d]” Gatorade. (*Id.*) It is unclear why Plaintiffs care one way or another about this.

1 is puffery); *Outdoor Techs., Inc. v. Vinyl Visions, LLC*, 2006 WL 2849782 *4 (S.D. Ohio 2006)
 2 (phrases such as “best,” “new and improved,” or “redesigned and improved” have all been held to
 3 be puffery).

4 In sum, notwithstanding the Court’s Order, two Plaintiffs cannot make any allegation that
 5 they relied on any of the off-label ads cited in the FAC. As to Plaintiff Hill, he does not identify a
 6 false statement, reliance, or causation, contrary to the Court’s Order.

7 **II. PLAINTIFFS’ NEW AND UNAUTHORIZED “FLAVOR” CLAIM IS MERITLESS**

8 In addition to the amendments allowed by the Court, the FAC added some allegations
 9 claiming that the “real” reason Plaintiffs bought the products was that they thought that each
 10 product they bought (and continued to purchase for four years) contained the juice from every fruit
 11 in the name of the product, *i.e.*, that Strawberry-Banana had banana juice in it. (FAC ¶¶ 85-87.)
 12 Although they have now abandoned their theory that BodyArmor committed a technical violation
 13 of FDA regulations regarding fortification, which the Court rejected (Order at 16-17), Plaintiffs
 14 attempt to fortify their new theory by citing different, and inapplicable, technical FDA regulations.
 15 (FAC ¶¶ 82-94.) These arguments – which are inconsistent with their previously stated reasons for
 16 supposedly buying the products – all lack merit.

17 Most importantly, everyone knows that the name of a beverage often describes its flavor
 18 and is not somehow a guarantee of its ingredients. BodyArmor® Strawberry-Banana is the flavor
 19 of the beverage in the same way that Dr. Pepper Cream Soda does not contain cream,⁴ Snapple
 20 Peach Tea does not contain peaches,⁵ and San Pellegrino Tangerine and Wild Strawberry does not
 21 contain tangerines or wild strawberries.⁶ This obviously includes Plaintiffs who each continued to
 22 buy multiple varieties of BodyArmor for four years because they enjoyed the flavor knowing that it
 23 did not contain any fruit juice. Many of the product names, such as Blackout Berry and the tropical
 24 and fruit punch flavors purchased by each of the Plaintiffs (FAC ¶¶ 14, 23, 33), do not even specify
 25 any type of fruit Plaintiffs supposedly thought they were receiving.

26 _____
 27 ⁴ <https://www.drpepper.com/en/products/drpepper-diet-cream>.

28 ⁵ <https://www.snapple.com/products/snapple-peach-tea>.

⁶ <https://www.sanpellegrino.com/us/en/essenza-flavored-sparkling-water>.

1 BodyArmor’s labels call out in multiple locations that the drinks are “naturally flavored”
 2 and the ingredient list properly discloses all of the ingredients – none of which is fruit juice. Under
 3 these circumstances, there is no possibility that Plaintiffs were somehow misled.

4 Courts have rejected similar claims as implausible. For example, in *Steele v. Wegmans*
 5 *Food Markets, Inc.*, — F. Supp. 3d —, 19 Civ. 9227 (LLS), 2020 WL 3975461 (S.D.N.Y. July 14,
 6 2020), Judge Louis L. Stanton in the Southern District of New York found that it was not
 7 misleading to market ice cream as “vanilla” despite having no vanilla beans in it because the label
 8 disclosed it was naturally flavored:

9 Of course [a reasonable consumer] is not looking for a bowl of
 10 vanilla.... Evidently there are various natural substances which have
 11 a vanilla flavor. Those interested in the actual ingredients can read
 the list, which mentions neither vanilla beans nor extracts

12 The Wegmans container does not mention vanilla beans, or bean
 13 extract, and even if vanilla or bean extract is not the predominant
 14 factor if the sources of the flavor are natural, not artificial, it is hard
 to see where there is deception. What is misrepresented? The ice
 cream is vanilla flavored. The sources of the flavor are natural, not
 artificial.

15 *Id.* at *2. The same logic applies here. Plaintiffs were not looking for a bottle of fruit juice; if they
 16 were, they could have bought one from the refrigerated aisle.⁷ Plaintiffs do not allege that
 17 BodyArmor’s products lack the flavors described on their labels. The ingredients were fully
 18 disclosed. The sources of the flavor are natural. Nothing was misrepresented.

19 Nor do any of the FDA regulations cited in the FAC require BodyArmor to include some
 20 unspecified quantity of fruit juice in its products. Plaintiffs rely on an FDA regulation that
 21 expressly “permits a manufacturer to use the name and image of a fruit on a product’s packaging to
 22 describe the characterizing flavor of the product even where the product does not contain any of
 23 that fruit, or contains no fruit at all.” *Larsen v. Trader Joe’s Co.*, 917 F. Supp. 2d 1019, 1024 n.2
 24 (N.D. Cal. 2013); *In re Quaker Oats Maple & Brown Sugar Instant Oatmeal Litig.*, 2017 WL
 25 4676585, at *5 (C.D. Cal. Oct. 10, 2017). When the “food contains no artificial flavor which
 26 simulates, resembles or reinforces the characterizing flavor,” the regulation requires that the label
 27

28 ⁷ As noted below, Plaintiffs do not purportedly want fruit juice anyway, as fruit juice has more
 sugar per serving than BodyArmor

1 “be accompanied by the common or usual name of the characterizing flavor.” 21 C.F.R.
 2 § 101.22(i)(1). Plaintiffs do not allege that BodyArmor’s sports drinks contain any artificial flavor,
 3 and the labels clearly display the drinks’ characterizing flavor.

4 Plaintiffs also allege that BodyArmor sports drinks do not contain a characterizing amount
 5 of fruit, and it therefore violated a provision of the regulation that requires the fruit label to be
 6 followed by the word “flavored.” (FAC ¶¶ 88, 90-91.) But that requirement applies only “if the
 7 food is one that is *commonly expected* to contain a characterizing food ingredient, e.g., strawberries
 8 in ‘strawberry shortcake.’” 21 C.F.R. § 101.22(i)(1)(i) (emphasis added). Plaintiffs do not and
 9 cannot allege that sports drinks are commonly expected to contain the actual fruits on which their
 10 flavors are based. Nor could they. Almost no sports drinks are made with fruit juice, which is why
 11 they are shelf stable and need not be sold in the refrigerated aisles, like fruit juice – as demonstrated
 12 repeatedly in the images included in the FAC. (FAC ¶ 96.)

13 Plaintiffs assert that “upon information and belief, BodyArmor contains unnamed
 14 ingredients that function as inauthentic flavors simulating the taste of the named and imaged
 15 fruits.” (*Id.* ¶ 89.) To the extent that Plaintiffs are attempting to argue that BodyArmor’s use of
 16 both a characterizing flavor and other natural flavors requires it also include that information on the
 17 label, this requirement likewise applies only to foods commonly expected to contain the
 18 characterizing food ingredient, not sports drinks. 21 C.F.R. § 101.22(i)(1)(iii) (“the food shall be
 19 labeled in accordance with the introductory text and paragraph (i)(1)(i) of this section” containing
 20 the “commonly expected” caveat).

21 Like the original complaint, the FAC fails to plausibly allege that BodyArmor has
 22 committed any technical violation of any FDA regulation.

23 **III. THE PUFFERY AND HALO CLAIMS THAT THE COURT ALREADY HELD** 24 **FAILED AS A MATTER OF LAW STILL FAIL AS A MATTER OF LAW**

25 The bulk of the amendments to the FAC add allegations related claims the Court already
 26 dismissed as a matter of law. These include dozens of allegations about studies on hydration and
 27 sugar, athlete endorsements, and politicians’ speeches (FAC ¶¶ 47-91), none of which are
 28

1 referenced on the product labels. Plaintiffs do not claim to have seen or relied on any of these new
 2 references, and they do not somehow render any of BodyArmor’s advertising misleading.

3 The Court already held that, as a matter of law, that “the statements ‘Superior Hydration’
 4 and ‘More Natural Better Hydration’ are non-actionable puffery. These are general, vague
 5 statements about product superiority rather than a misdescription of a specific or absolute
 6 characteristic of the product.” (Order at 9, citing *Southland Sod Farms v. Stover Seed Co.*, 108
 7 F.3d 1134, 1145 (9th Cir. 1997).)

8 Similarly, relying on Judge Alsup’s decision in *Perfect Bar* and Judge White’s decision in
 9 *Truxel* – both of which Plaintiffs disparaged and mischaracterized in their last round of briefing –
 10 the Court held: “The Court concludes that the complaint fails to state a claim that plaintiffs were
 11 misled about the healthiness of BodyArmor because a reasonable consumer would not be deceived
 12 about the nature of sports drink they were buying.” (Order at 14.)

13 Plaintiffs now repeat these identical claims in the FAC, as if the Court had never rejected
 14 them. To the extent the Court even reads any further, Plaintiffs’ new allegations fail for same the
 15 reasons the Court gave last time.

16 **A. “Superior Hydration” and Similar Claims Are Puffery**

17 The Court has already held that “the statements ‘Superior Hydration’ and ‘More Natural
 18 Better Hydration’ are non-actionable puffery.” (Order at 9, 11.) Specifically, the Court held that it
 19 is “implausible that a reasonable consumer would view the BodyArmor label and other marketing
 20 about ‘superior,’ ‘more’ or ‘better’ and believe that BA was making a specific, verifiable claim
 21 about BodyArmor’s superior hydrating attributes.”

22 As the Court already explained in rejecting Plaintiffs’ puffery claims:

23 “Product superiority claims that are vague or highly subjective often
 24 amount to nonactionable puffery. *Id.* On the other hand, “[a]
 25 specific and measurable claim of product superiority based on
 26 product testing is not puffery.” *Id.*

27 (Order at 8 (quoting *Southland*, 108 F.3d at 1145.)) The Court further explained that “[T]he
 28 determination of whether an alleged misrepresentation ‘is a statement of fact’ or is instead ‘mere

1 puffery’ is a legal question that may be resolved on a Rule 12(b)(6) motion.” (Order at 8, citing
 2 *NewCal Indus., Inc. v. Ikon Office Solution*, 513 F.3d 1038, 1053 (9th Cir. 2008).)

3 The FAC adds allegations that hydration is an “objective” concept, because scientists have
 4 studied it and because famous athletes like Kobe Bryant and Mike Trout truthfully said drinking
 5 BodyArmor helped them keep hydrated and suffer fewer muscle cramps. (FAC ¶¶ 51-57.) These
 6 allegations are irrelevant; the FAC does not allege that BodyArmor’s labels reference these alleged
 7 studies, make any claim of product superiority based on such studies, or that Plaintiffs saw, much
 8 less relied on, the studies or athlete endorsements described in the FAC. As it did in its Order
 9 dismissing these claims at page 3, the Court may take judicial notice that BodyArmor’s labels do
 10 not reference any product testing or studies whatsoever. That is the end of Plaintiffs’ puffery
 11 claim. (Order at 8.)

12 Moreover, that scientists might be able to measure hydration in athletes does not mean that
 13 general phrases like “superior hydration” or “more natural better hydration” are also objective or
 14 measurable. Modifying the term “hydration” with words like “superior” and “better” is precisely
 15 what makes these phrases puffery, as the Court previously held. (Order at 9.) This principle has
 16 been repeatedly affirmed by this Court in its Order dismissing these claims and many others. For
 17 example, in *Oestreicher v. Alienware Corp.*, Judge Patel dismissed as puffery the following claims
 18 about a computer: “faster, more powerful, and more innovative than competing machines,” “higher
 19 performance,” “longer battery life,” “richer multimedia experience,” “faster access to data,” and
 20 “ensure optimum performance.” 544 F. Supp. 2d 964, 973 (N.D. Cal. 2008). These statements
 21 involve measurable computer attributes, e.g., processor speed, and at least one of them makes this
 22 claim vis-à-vis “competing machines.” Her decision was affirmed by the Ninth Circuit.
 23 *Oestreicher v. Alienware Corp.*, 322 F. App’x 489, 493 (9th Cir. 2009).

24 Judge Koh likewise dismissed a claim that a truck having “superior gas mileage and
 25 performance to previous Ford models”:

26 “[W]hen asked how the 2008 F-350 would perform in comparison
 27 with Plaintiff’s prior 1996 Ford truck[,] the salesperson represented
 28 that the ‘2008 F-350 is a better truck with better performance;
 guaranteed’ ” and that “the 2008 F-350 had superior gas mileage and

performance to previous Ford models.” These statements are quintessential, non-actionable puffery.

Wayne W. Yetter v. Ford Motor Comp., No. 19-CV-00877-LHK, 2019 WL 7020348 *18 (N.D. Cal. Dec. 20, 2019). These statements discuss product traits and make a comparison to other products. But they are “quintessential, non-actionable puffery because the concepts of “superior gas mileage,” and “better performing” are typical vague, positive claims companies make about their products. Indeed, superior gas mileage to a previous Ford model is far more concrete than the language at issue here, “superior hydration.” Consumers can look up the gas mileage of previous models, a known, measurable fact, and make inferences about the new Fords. In contrast, as this Court has already found, “there is nothing specific” in the statement “superior hydration” that is “measurable, capable of verification, or capable of being proved false.” (Order at 10-11.) It is not a comparison to anything, and, notwithstanding the numerous studies cited in the complaint, Plaintiffs offer no benchmark anyone could reference to measure a beverage’s hydration.

Countless other cases have reached the same result. *E.g.*, *Finney v. Ford Motor Co.*, No. 17-cv-06183-JST, 2018 WL 2552266, *8 (N.D. Cal. June 4, 2018) (“longest lasting diesel motor” and “the longest lasting diesel in its class” were puffery); *Univ. of Fla. Research Found., Inc. v. Orthovita, Inc.*, 1998 WL 34007129 *27 (N.D. Fla. Apr. 20, 1998) (“unless a claim that a product is ‘better’ than a competitor’s is ‘backed-up’ with false allegations that ‘tests prove’ superiority when no such tests or only unreliable tests exist to support such a claim, the superiority claim constitutes no more than unactionable puffery”); *Cytec Corp. v. Neuromedical Sys., Inc.*, 12 F. Supp. 2d 296, 304-05 (S.D.N.Y. 1998) (“the ThinPrep system offers a ‘superior method of slide preparation that produces improved diagnostic quality, resulting in better patient outcome’” is puffery); *Shaker v. Nature's Path Foods, Inc.*, 2013 WL 6729802 (C.D. Cal. Dec. 16, 2013) (use of “Optimum” on cereal package constituted non-actionable puffery); *In re Boston Beer Co.*, 198 F.3d 1370, 1372 (Fed. Cir. 1999) (“The Best Beer in America” was “puffery”); *Apodaca v. Whirlpool Corp.*, 2013 WL 6477821*6 (C.D. Cal. Nov. 8, 2013) (“statements about dependability and superiority,” including comments such as “unequaled tradition of quality production” or “unrivaled performance” are “too vague to be actionable”); *Atari Corp. v. 3D0 Co.*, No. C 94-20298 RMW (EAI) 1994 WL 723601 *2 (N.D. Cal. 1994) (“the most advanced home gaming system in the

universe” was nonactionable puffery); *Nikkal Indus., Ltd. v. Salton, Inc.*, 735 F. Supp. 1227, 1234 n.3 (S.D.N.Y. 1990) (claim that an ice cream maker was “better” than competition is puffery); *Greater Houston Transp. Co. v. Uber Techs., Inc.*, 155 F. Supp. 3d 670, 683 (S.D. Tex. 2015) (“the strictest safety standards possible” was puffery); *Guidance Endodontics, LLC v. Dentsply Intern., Inc.*, 708 F. Supp. 2d 1209, 1241 (D.N.M. 2010) (“world's best” dental equipment and “best in the world” were puffery; “Whether one thing of another is the ‘best’ is a normative assessment that involves weighing potentially infinite and sometimes immeasurable factors.”); *By Design, LLC v. Sammy's Sew Shop, LLC*, 2016 WL 6093778 (D. Kan. Oct. 19, 2016) (defendants' statements regarding the “high quality” of their pet beds were subjective and constituted mere puffery); *Sustainable Sourcing, LLC v. Brandstorm, Inc.*, 2016 WL 3064055 (D. Mass. May 31, 2016) (“the purest salt on earth” was mere puffery and not a “technically verifiable” claim); *see also* 2 McCarthy on Trademarks and Unfair Competition § 11:17 (5th ed.) (collecting cases describing puffery in the context of trademarks to include “best, friendly, dependable, preferred, greatest, deluxe, supreme”).

B. Plaintiffs’ Claims that BodyArmor’s Statements Misled Them About Sugar or “Health” Are Implausible

The FAC adds no allegations of substance to support Plaintiffs’ claims they were misled about BodyArmor’s sugar content or “overall healthiness.” The Court already dismissed this theory on at least three grounds – none of which is addressed in the FAC:

[1] The Court finds that this claim is implausible because it requires unsupported inferences – that “Superior Hydration” conveys something more generally about overall healthiness and positive impact on one’s well-being

[2] it requires that a reasonable consumer ignore the prominently displayed Nutrition Facts disclosing the total amount of sugar, as well as the ingredient list stating that “pure cane sugar” is the second ingredient.

[3] A reasonable consumer purchasing a sports drink (in such flavors as Fruit Punch, Berry Blast, Tropical Fruit and Grape) would not be misled into thinking that simply because the label states that it provides “Superior Hydration” and contains vitamins and electrolytes, that this necessarily means anything about the overall health benefits of the product given the disclosure of the sugar content.

(Order at 15 (brackets added).) Just like last time: (1) “superior hydration” is not a claim about the overall healthiness of the beverage, (2) the ingredients plainly list sugar, and the Nutrition Facts accurately state the amount of sugar – as they did in *Perfect Bar* and *Truxel*, and (3) simply because the labels make truthful statements about the vitamins and electrolytes in the product is not a basis for claiming that Plaintiffs were somehow misled about the sugar content of the products.

As noted in BodyArmor’s prior motion to dismiss at 10-13, Courts have rejected Plaintiffs’ amorphous “halo” theory because it can be used to generate a lawsuit over anything. A 16 oz. glass of orange juice contains over 40 grams of sugar. See <https://www.fatsecret.com/calories-nutrition/usda/orange-juice>. This is *more sugar* than the 36 grams cited in the Complaint or the 28 grams on Body’s Armor’s current label. Under Plaintiffs’ made up rule, an orange juice company could be sued for putting a picture of a child playing in a yard on its label (or social media) because this could suggest that the product was “healthy.” The same theory could be applied to any food or beverage containing fat, carbs, too little protein, too much protein, too much sodium, not enough sodium, etc.

C. The Gatorade Claims Are Irrelevant

Plaintiffs again attempt to interject irrelevant NAD proceedings into this case. As in its prior order, the Court should give no weight to these proceedings – because they are entitled to none. *Pom Wonderful LLC v. Tropicana Prod., Inc.*, No. CV 09-00566-DSF, 2010 WL 11519185, at *4 (C.D. Cal. Nov. 1, 2010) (“[q]uasi-governmental agencies like the NAD” that “provide only informal and non-binding reports and opinions, and whose review process is not subject to any evidentiary or procedural safeguards ... are inadmissible”).

IV. PLAINTIFFS’ CLAIMS ARE SEPARATELY BARRED BY THE FIRST AMENDMENT

Although the Court did not reach this issue on the last motion to dismiss, each cause of action in the Complaint is separately and independently barred by the First Amendment. Plaintiffs’ proposed state-law regulation punishing BodyArmor’s truthful speech violates the First Amendment under any test. There is no governmental interest in preventing BodyArmor from making truthful statements on its labels or compelling it to disclose Plaintiffs’ lawyers’ health

1 theories. Nor is their regulation in any way tailored to achieving such interest; it is so nebulous that
 2 no business could comply with it, resulting in a substantial suppression of protected speech.

3 In *CTIA-The Wireless Association v. Berkeley*, 928 F.3d 832 (9th Cir. 2019), the Ninth
 4 Circuit stated that *Central Hudson* scrutiny applies “in commercial speech cases where the
 5 government acts to restrict or prohibit speech,” and that the standard in *Zauderer v. Office of*
 6 *Disciplinary Counsel*, 471 U.S. 626 (1985), as refined by *National Institute of Family and Life*
 7 *Advocates v. Becerra*, 138 S. Ct. 2461 (2018) (“*NIFLA*”), applies to regulations that compel
 8 speech. See also *Am. Bev. Ass’n v. San Francisco*, 916 F.3d 749, 756 (9th Cir. 2019) (en banc).
 9 *NIFLA*’s command that content-based regulations are subject to strict scrutiny even in the
 10 commercial speech context was recently affirmed by the Supreme Court in *Barr v. American*
 11 *Association of Political Consultants, Inc.*, — S. Ct. —, 2020 WL 3633780 (July 6, 2020)
 12 (invalidating provision of Telephone Consumer Protection Act that allowed robocalls to collect
 13 government-backed debt but not private debt as an unconstitutional content-based restriction on
 14 speech) (“*AAPC*”).

15 Plaintiffs’ complaint seeks to both punish BodyArmor for its speech and to compel a
 16 “corrective advertising campaign.” (Compl. ¶¶ 122, 132.) Regardless of which standard is applied,
 17 Plaintiffs’ claims cannot withstand scrutiny.

18 **A. Plaintiffs’ Regulation Does Not Survive *Central Hudson***

19 To the extent *Central Hudson Gas & Electric Corporation v. Public Service Commission*,
 20 447 U.S. 557 (1980), applies, Plaintiffs’ claims fail. Under *Central Hudson*, “the government may
 21 restrict or prohibit commercial speech that is neither misleading nor connected to unlawful activity,
 22 as long as the governmental interest in regulating the speech is substantial. The restriction or
 23 prohibition must directly advance the governmental interest asserted, and must not be more
 24 extensive than is necessary to serve that interest.” *Am. Bev.*, 916 F.3d at 755 (citations and
 25 quotations omitted).

26 Plaintiffs’ proposed regulation does not serve any substantial government interest. After
 27 years of study and analyzing over 300,000 submissions, the FDA, which is responsible for
 28 regulating food advertising, rejected establishing a daily recommended value for sugar. 81 Fed.

1 Reg. 33,798. It also rejected a proposal that products with added sugar carry a warning asserting
 2 they are “linked to obesity, Type II Diabetes, [and other health risks]” because it believes that such
 3 a statement is “not consistent with [its] review of the evidence” and because “some added sugars
 4 can be included as part of a healthy dietary pattern.” *Id.* at 33,829. Because the FDA has
 5 considered, and rejected, regulating “health claims” based on sugar content, and because
 6 BodyArmor’s labels truthfully disclose all ingredients, Plaintiffs’ cannot meet their burden of
 7 showing a substantial government interest. *Sorrell v. IMS Health Inc.*, 564 U.S. 552, 571-72
 8 (2011); *see also United States v. Caronia*, 703 F.3d 149, 166-67 (2d Cir. 2012) (proscribing off-
 9 label drug use did not directly advance a substantial governmental interest because off-label use is
 10 “generally lawful” and the promotion was entirely true).

11 Nor is Plaintiffs’ proposed regulation tailored to achieve any interest beyond litigation.
 12 Plaintiffs’ regulation has no limits. It would allow anyone to sue BodyArmor on any theory of
 13 what a “healthy” sports drink should, or should not, have based on any daisy-chain of inferences.
 14 Could BodyArmor truthfully state it contains electrolytes without fear of suit for implying the
 15 product is “healthy?” Could BodyArmor truthfully explain how it is made with coconut water
 16 without someone inferring that coconuts are “healthy”? Could BodyArmor put an image of
 17 someone playing a sport on the label of its sports drink? Plaintiffs’ amorphous rule would chill
 18 truthful speech and is the definition of overbreadth.

19 **B. Plaintiffs’ Regulation Does Not Survive *NIFLA/Zauderer***

20 To the extent *AAPC/NIFLA/Zauderer* applies, Plaintiffs’ regulation fails because it is a
 21 content-based restriction that does not qualify for anything less than strict scrutiny.

22 **1. Plaintiffs’ Regulation Is an Unconstitutional Content-Based Restriction** 23 **on Speech**

24 Regulations that “target speech based on its communicative content ... are presumptively
 25 unconstitutional and may be justified only if the government proves that they are narrowly tailored
 26 to serve compelling state interests.” *NIFLA*, 138 S. Ct. at 2371 (citing *Reed v. Town of Gilbert*, 135
 27 S. Ct. 2218, 2226 (2015)) (quotation omitted). “This stringent standard reflects the fundamental
 28 principle that governments have ““no power to restrict expression because of its message, its idea,

its subject matter, or its content.” *NIFLA*, 138 S. Ct. at 2371 (quoting *Reed*, 135 S. Ct. at 2226 (quoting *Police Dept. v. Mosley*, 408 U.S. 92, 95 (1972))); *see also AAPC*, 2020 WL 3633780 *6 (“Under the Court’s precedents, a law that is content-based” is “subject to strict scrutiny.” (internal quotation omitted)).

In *NIFLA*, the Court held that a law mandating that private crisis pregnancy centers operated by groups opposed to abortion disclose the availability of state-sponsored services, including abortion, was content-based because it altered the content of the speech. *NIFLA*, 138 S. Ct. at 2371 (“By requiring petitioners to inform women how they can obtain state-subsidized abortions – at the same time petitioners try to dissuade women from choosing that option – the licensed notice plainly alters the content of petitioners’ speech.” (quotation omitted)). Similarly here, Plaintiffs seek to hold BodyArmor liable because its labels implied to them that BodyArmor contains a “healthy” amount of sugar, when in their view, it does not. This claim is based purely on the (supposed) content of BodyArmor’s advertising.

Since Plaintiffs’ regulation is content-based, it must survive strict scrutiny. *Id.* It cannot, for the reasons stated above.

2. Plaintiffs’ Regulation Does Not Fall under Either Exception to *NIFLA*

In *NIFLA*, the Court rejected the idea that content-based restrictions on “professional” or “commercial” speech are generally subject to a lower level of scrutiny. The Court confirmed its reluctance to “mark off new categories of speech for diminished constitutional protection” or to “exempt a category of speech from the normal prohibition on content-based restrictions.” 138 S. Ct. 2372 (citations and quotations omitted); *see also id.* (“This Court’s precedents do not permit governments to impose content-based restrictions on speech without persuasive evidence of a long (if heretofore unrecognized) tradition to that effect.” (citations and quotations omitted)).

The Court acknowledged just two instances where commercial speech may be afforded less protection: “laws that require professionals to disclose factual, noncontroversial information,” and regulations of “professional conduct, even though that conduct incidentally involves speech.” *Id.* (collecting cases). The second exception does not apply here because Plaintiffs are not claiming BodyArmor engaged in some sort of professional malpractice.

1 The first exception is also inapplicable because Plaintiffs do not only seek to compel
 2 BodyArmor to disclose purely factual, noncontroversial information. As noted above, there is
 3 excessive scientific debate, and no consensus, about sugar.

4 The Ninth Circuit recently examined this aspect of *NIFLA* in the context of an ordinance
 5 mandating a disclosure about radio-frequency (“RF”) radiation emitted from cellphones. In *CTIA*,
 6 the Court of Appeals concluded that a compelled disclosure which was “literally true,” referenced
 7 the applicable federal regulations, and used language identical to the federal regulations, was
 8 subject to more deferential review. 928 F.3d at 847-48. For the reasons above, nothing is “literally
 9 true” about the disclosures Plaintiffs would impose.

10 Indeed, nutrition guidance is constantly evolving and often disputed. *See, e.g.,* R. Primack,
 11 *Researchers Now Have a Much More Nuanced Understanding of Whether We Should Eat Pasta*,
 12 WASH. POST (July 6, 2016), *available at*
 13 [https://www.washingtonpost.com/news/wonk/wp/2016/07/06/researchers-nowhave-a-much-more-](https://www.washingtonpost.com/news/wonk/wp/2016/07/06/researchers-nowhave-a-much-more-nuanced-understanding-of-whether-we-should-eat-pasta/)
 14 [nuanced-understanding-of-whether-we-should-eat-pasta/](https://www.washingtonpost.com/news/wonk/wp/2016/07/06/researchers-nowhave-a-much-more-nuanced-understanding-of-whether-we-should-eat-pasta/). Just as with pasta, fat, salt, wine, coffee,
 15 and countless other nutrients and foods, the FDA and scientists continue to debate the impact of
 16 consuming sugar and how much sugar one should consume. What makes food healthy, including
 17 its sugar content, is “anything but an ‘uncontroversial’ topic.” *NIFLA*, 138 S. Ct. at 2372.
 18 Accordingly, as in *NIFLA*, “*Zauderer* has no application here.” *Id.*

19 Finally, even if *Zauderer* did apply, Plaintiffs’ claims would still fail because they are not
 20 reasonably related to a substantial governmental interest, as *Zauderer* requires. *See Am. Bev.*, 916
 21 F.3d at 755 (“Under *Zauderer*, the government may compel truthful disclosures in commercial
 22 speech as long as the compelled disclosure is reasonably related to a substantial governmental
 23 interest.” (internal citations and quotations omitted)). Plaintiffs offer no evidence or facts to support
 24 their theory that foods with a certain quantity of added sugar is unhealthy. Nor do they provide any
 25 reason to believe consumers lack sufficient information to evaluate the healthiness of BodyArmor
 26 drinks given all the truthful disclosures on the product packaging.

27 In sum, the First Amendment is an additional separate and independent ground for
 28 dismissing all of Plaintiffs’ claims with prejudice.

V. PLAINTIFFS DO NOT STATE A CLAIM FOR UNJUST ENRICHMENT

For the reasons above, BodyArmor's advertising is not misleading. There has thus been no injustice and so no enrichment. Plaintiffs' unjust enrichment claims therefore fail. *Weiss v. Trader Joe's Co.*, Case No. 8:18-cv-01130-JLS-GJS, 2018 WL 6340758 *8 (N.D. Cal. Nov. 20, 2018) (where false advertising claims concerning ionized water failed, tag-along unjust enrichment claim also failed); *see also Ebner v. Fresh, Inc.*, 838 F.3d 958, 968 (9th Cir. 2016) (unjust enrichment claim mooted where complaint failed to state a claim as to other causes of action); *SodexoMAGIC, LLC v. Drexel Univ.*, 333 F. Supp. 3d 426, 473 (E.D. Pa. 2018) (“Where the unjust enrichment claim rests on the same improper conduct as the underlying tort claim, the unjust enrichment claim will rise or fall with the underlying claim.”)

Under New York law, “an unjust enrichment claim is available ‘only in unusual situations when, though the defendant has not breached a contract nor committed a recognized tort, circumstances create an equitable obligation running from the defendant to the plaintiff.’” *Paulino v. Conopco, Inc.*, 2015 WL 4895234, at *3 (E.D.N.Y. Aug. 17, 2015) (quoting *Corsello v. Verizon N.Y., Inc.*, 18 N.Y.3d 777, 790 (2012)). “It is not a ‘catchall cause of action to be used when others fail,’ and is typically limited to instances where ‘the defendant, though guilty of no wrongdoing, has received money to which he or she is not entitled.’” *Id.* (citation omitted). “An unjust enrichment claim that merely, ‘duplicates, or replaces, a conventional contract or tort claim’ is insufficient.” *Id.* (citation omitted).

Where, as here, an unjust enrichment claim is based on the same allegations as other claims, the claim should be dismissed as duplicative. *See Sitt v. Nature's Bounty, Inc.*, 2016 WL 5372794, at *18 (E.D.N.Y. Sept. 26, 2016) (dismissing claim as duplicative where “Plaintiff's unjust enrichment claims under New York law are based on the same allegations as her claims of violations of GBL sections 349 and 350”); *Hidalgo v. Johnson & Johnson Consumer Cos., Inc.*, 148 F. Supp. 3d 285, 298 (S.D.N.Y. 2015) (dismissing unjust enrichment claim with prejudice where it was “based on identical facts as the [GBL] Section 349 claim”); *Goldemberg v. Johnson & Johnson Consumer Companies, Inc.*, 8 F. Supp. 3d 467, 483 (S.D.N.Y. 2014) (dismissing unjust enrichment claim relating to allegations of deceptive labeling and advertising of personal care

products); *Silva v. Smucker Nat. Foods, Inc.*, 2015 WL 5360022, at *12 (E.D.N.Y. Sept. 14, 2015) (dismissing unjust enrichment claim as duplicative of other claims, including GBL §§ 349 and 350); *Koenig v. Boulder Brands, Inc.*, 995 F. Supp. 2d 274, 290-291 (S.D.N.Y. 2014) (dismissing unjust enrichment claim as duplicative in case alleging deceptive milk product labeling); *Paulino*, 2015 WL 4895234, at *3-4 (noting various “decisions involving the deceptive labeling of consumer goods have dismissed unjust enrichment claims as duplicative or otherwise unavailable at the motion to dismiss stage.”); *Ebin v. Kangadis Food Inc.*, No. 13–CV–2311 (JSR), 2013 WL 6504547, at *7 (S.D.N.Y. Dec. 11, 2013) (dismissing unjust enrichment claim as duplicative); *Weisblum v. Prophase Labs, Inc.*, 88 F. Supp. 3d 283, 296 (S.D.N.Y. 2015) (dismissing unjust enrichment claim as duplicative of contract and tort claims). Accordingly, plaintiffs’ unjust enrichment claim should be dismissed.

VI. PLAINTIFFS LACK STANDING TO SEEK INJUNCTIVE RELIEF

In their Prayer, Plaintiffs seek “injunctive relief.” (Compl. ¶ 132; p. 38 (Prayer for Relief).) Plaintiffs lack standing to do so. To establish standing to seek injunctive relief, a plaintiff must demonstrate “a real and immediate threat of repeated injury.” *Bates v. United Parcel Serv., Inc.*, 511 F.3d 974, 985 (9th Cir. 2007). “In addition, the claimed threat of injury must be likely to be redressed by the prospective injunctive relief.” *Id.* “In the context of a class action, ‘[u]nless the named plaintiffs are themselves entitled to seek injunctive relief, they may not represent a class seeking that relief.’” *Romero v. Flowers Bakeries, LLC*, No. 14–cv–05189-BLF, 2015 WL 2125004, *7 (N.D. Cal. May 6, 2015) (quoting *Hodgers-Durgin v. de la Vina*, 199 F.3d 1037, 1045 (9th Cir. 1999)). Plaintiffs cannot establish such a threat, and their request for an injunction should therefore be dismissed for lack of standing.

First, Plaintiffs’ entire complaint is based on old labels and advertising from years ago. (Soffer Decl. ¶ 4) BodyArmor has changed its advertising several times since then, completely independent of Plaintiffs’ lawsuit, and now makes only one statement that Plaintiffs’ challenge: “Superior Hydration.”⁸ As discussed above, this statement is mere puffery, and Plaintiffs could

⁸ The Complaint does not identify any specific changes Plaintiffs seek to BodyArmor’s labeling, and it is unclear what they could expect to change.

not have relied on it. Plaintiffs’ claim for injunctive relief is moot. *Figy v. Frito-Lay N. Am. Inc.*, 67 F. Supp. 3d 1075, 1085 (N.D. Cal. 2014) (dismissing claims for injunctive relief because “[d]efendant has furnished two declarations showing the current labeling for the Products and specifically stating that the allegedly offending labels were no longer being printed when Plaintiffs filed their complaint”); *Nguyen v. Medora*, No. 14-cv-00618, 2015 WL 4932836, at *8 (N.D. Cal. Aug. 18, 2015) (“even if Plaintiffs did offer evidence of injury-in-fact and redressability, they still lack standing to pursue injunctive relief because Medora changed the packaging back in December 2013, before this suit was even filed”).⁹

Second, Plaintiffs allege that they would not have purchased BodyArmor if they had understood what they allegedly know now, that BodyArmor “does not provide them with a nutritious beverage overall” and that it is, in their eyes, a “fortified junk food” that contains a “tsunami of sugar.” (Compl. ¶¶ 17, 80.) It is implausible that Plaintiffs would continue to purchase BodyArmor given this belief. Accordingly, they are unlikely to purchase the product again and face no threat of repeated injury. Plaintiffs’ allegations to the contrary do not satisfy the Ninth Circuit’s ruling in *Davidson v. Kimberly-Clark Corp.*, 889 F.3d 956, cert. denied, 139 S. Ct. 640 (2018).

In *Davidson*, the Ninth Circuit held that “previously deceived” consumers such as Plaintiffs may establish a threat of future injury in certain limited circumstances, by plausibly alleging either (1) that they will not be able to rely on a product’s advertising or labeling in the future and therefore will not purchase the product, even though they would like to, or (2) that they might purchase the product in the future because they reasonably, but incorrectly, believe that, although the label remains the same, the product has been improved. *Id.* at 969-70.

Plaintiffs attempt to meet the requirements of *Davidson* by making boiler-plate allegations that if they “knew that BA’s marketing was truthful and non-misleading, and lawful,” they would “purchase BodyArmor in the future.” They contend, however, that “[a]t present,” they “cannot

⁹ See also *City of L.A. v. Lyons*, 461 U.S. 95, 102 (1983) (quoting *O’Shea v. Littleton*, 414 U.S. 488, 495–96 (1974)) (“Past exposure to illegal conduct does not in itself show a present case or controversy regarding injunctive relief if unaccompanied by any continuing, present adverse effects.”).

1 purchase the product because [they] cannot be confident that the marketing of the products is, and
 2 will be, truthful and non-misleading, or lawful.” (Compl. ¶¶ 27, 36, 44, 52.)

3 Plaintiffs’ allegations are not plausible and do not satisfy *Davidson*. Throughout the
 4 complaint, Plaintiffs belabor the amount of sugar in a serving of BodyArmor (an indication that
 5 they’ve read the label and know how much sugar it presently contains) as the reason they do not
 6 believe it is a “nutritious beverage overall.” (Compl. ¶¶ 10-17, 72-80.) Unlike in *Davidson*,
 7 Plaintiffs will be able to rely on the label in the future, because it has always correctly listed the
 8 amounts of sugar and added sugar in each product. By the same token, Plaintiffs will not buy
 9 BodyArmor under the mistaken belief that it has been reformulated with less sugar, because
 10 Plaintiffs can readily read the Nutrition Facts to make this determination. This case is unlike the
 11 situation in *Davidson* where the plaintiff could have erroneously believed that wipes labeled as
 12 “flushable” had been improved and were now truly flushable, even though they had not been
 13 before. 889 F.3d at 970-72. Here, Plaintiffs would presumably only purchase BodyArmor in the
 14 future if it contained less or no sugar. Should BodyArmor change its formulation in the future (and
 15 Plaintiffs allege no facts indicating that this may occur in any event), Plaintiffs can simply check
 16 the label to determine if it contains the amount of sugar they find acceptable and “nutritious” –
 17 whatever that means to them. Plaintiffs therefore face no immediate threat of future injury, and
 18 their claim for injunctive relief should be dismissed.

19 **VII. LEAVE TO AMEND SHOULD BE DENIED**

20 This Court has already granted Plaintiffs an opportunity to amend. The FAC fails to correct
 21 the deficiencies identified in that order. Further leave to amend should therefore be denied.

22 *Albrecht v. Lund*, 845 F.2d 193, 195 (9th Cir. 1988)

CONCLUSION

For the foregoing reasons, the Complaint should be dismissed with prejudice.

Dated: July 21, 2020

Respectfully Submitted,
